

I urge you to reject NAB's petition 04-160. I am a long distance truck driver. I have XM radio in my truck. I spend a lot of time on the highway and rely heavily on their weather reports, especially in the midwestern and western states. They give updates every 15 minutes. Also, if there are problems on the highways, they give helpful information to keep me moving. The NAB should spend their time and money improving their stations instead attacking XM radio. They have too many commercials and not enough info. I enjoy the variety of uninterrupted music, talk shows and even comedy channels. It helps the time pass away while I am driving and I have the benefit of staying informed on current events. That is the reason I decided to subscribe to XM. I pay for it and I would like to have the right to continue listening to it. Please reject this petition.
